Installing the Dell Command Application

The following directions will apply if you are unable to find **Dell Command | Update** in the Start Menu. If **Dell Command | Update** appears and is installed you can skip to the section "**Launching the Dell Command Application**" in this guide.

1. Click on the **Search Bar** at the bottom-left of the screen and type "**Software Center**" in the field.
2. The **Software Center** app will appear in the search results. Click either the "**Open**" option or press the **enter** key on your keyboard to open the app.

3. Once in **Software Center**, click the **Applications** tab from the left-hand menu and look for, then select the app labelled "**Dell Command | Update**".

4. The app details screen will appear. Click on the "**Install**" button to begin the installation process.

The screenshot shows the 'Application details' page for 'Dell Command | Update 4.1.0'. The page has a breadcrumb trail 'Applications > Application details'. Below the title, it says 'Published by Dell'. There are two buttons: 'Install' and 'Schedule'. The 'Install' button is circled in blue. Below the buttons, the status is 'Waiting for the next available maintenance schedule'. Other details include Version: 4.1.0, Date published: 1/29/2021, Restart required: Might be required, Download size: 17 MB, Estimated time: Not specified, and Total components: 1.

Launching the Dell Command Application

1. Click on the **Start Menu** at the bottom-left of the screen and type "**Dell Command Update**" in the search bar.
2. Click on the app "**Dell Command | Update**" to open the application.

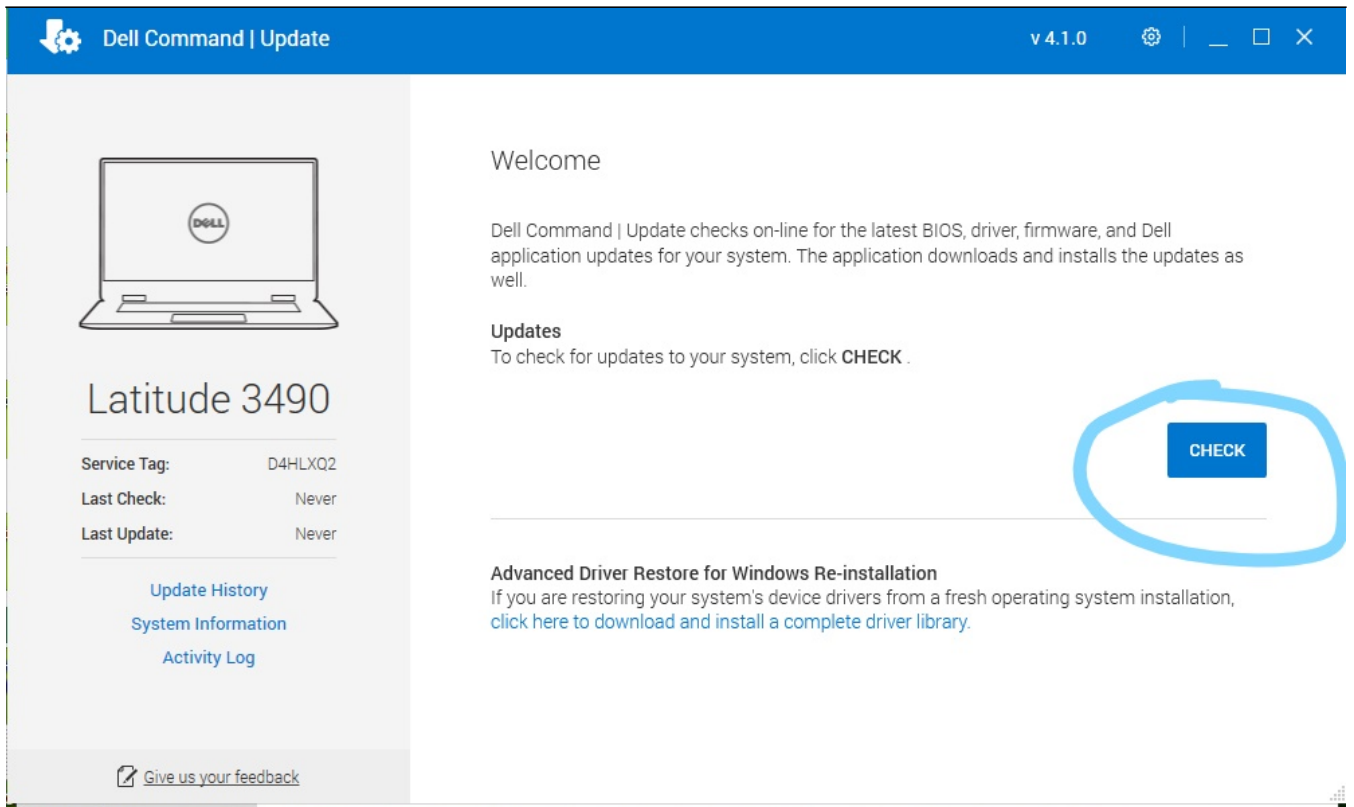

- If **Dell Command | Update** does not appear in the start menu please follow the directions in the section "**Installing the Dell Command Application**" to install the app. If the app still does not open or appear you can contact the LPS Help Desk for further assistance.

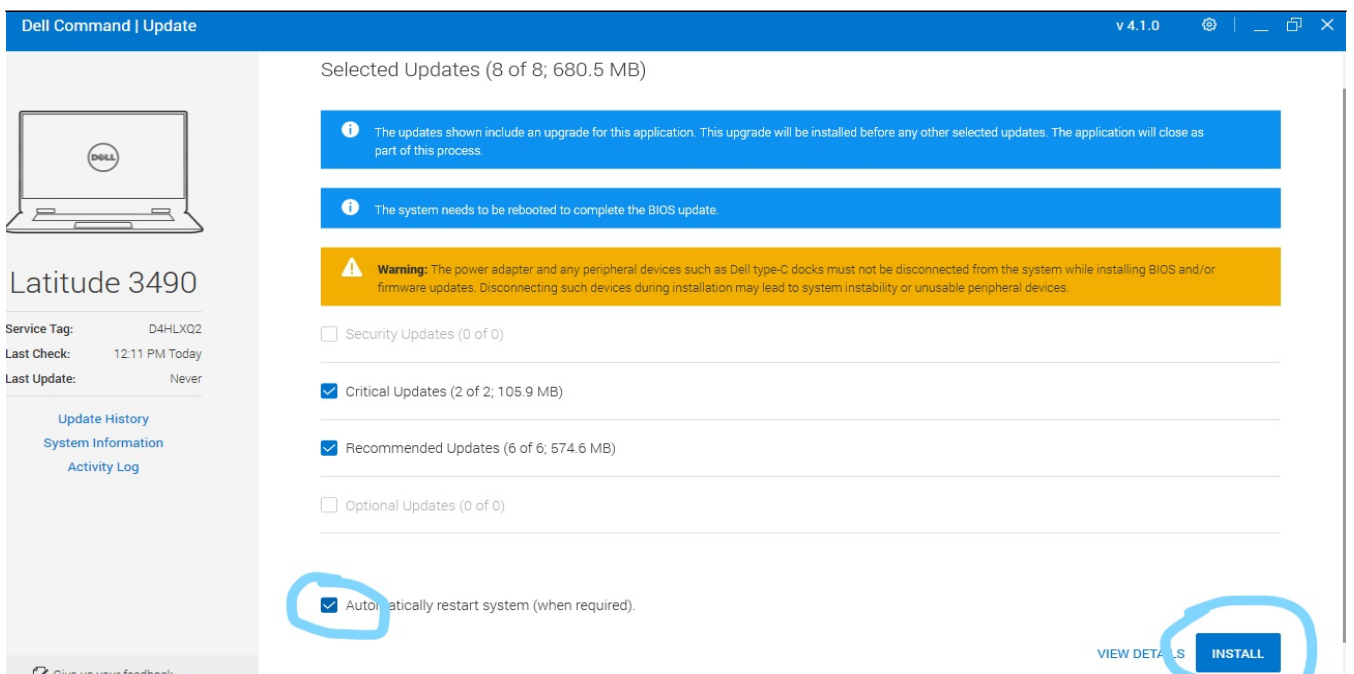

Checking and Installing Updates

1. Inside **Dell Command | Update** app click the **Check** button.

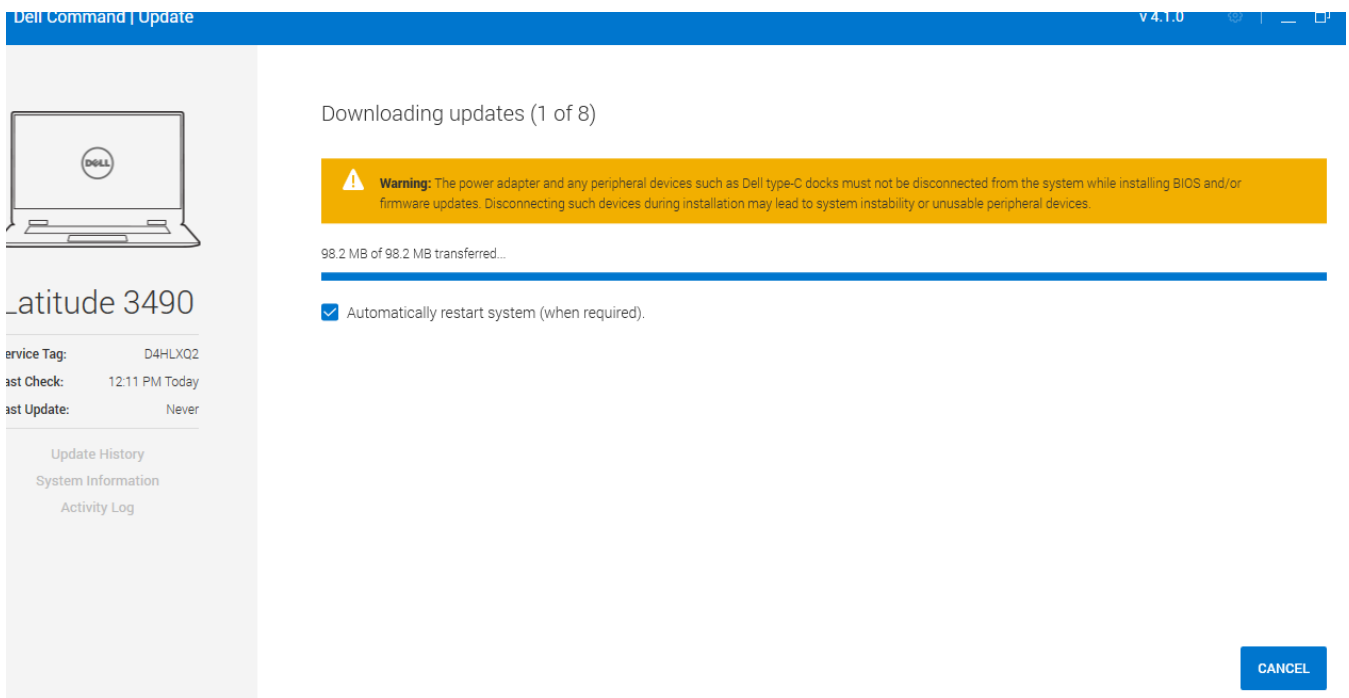

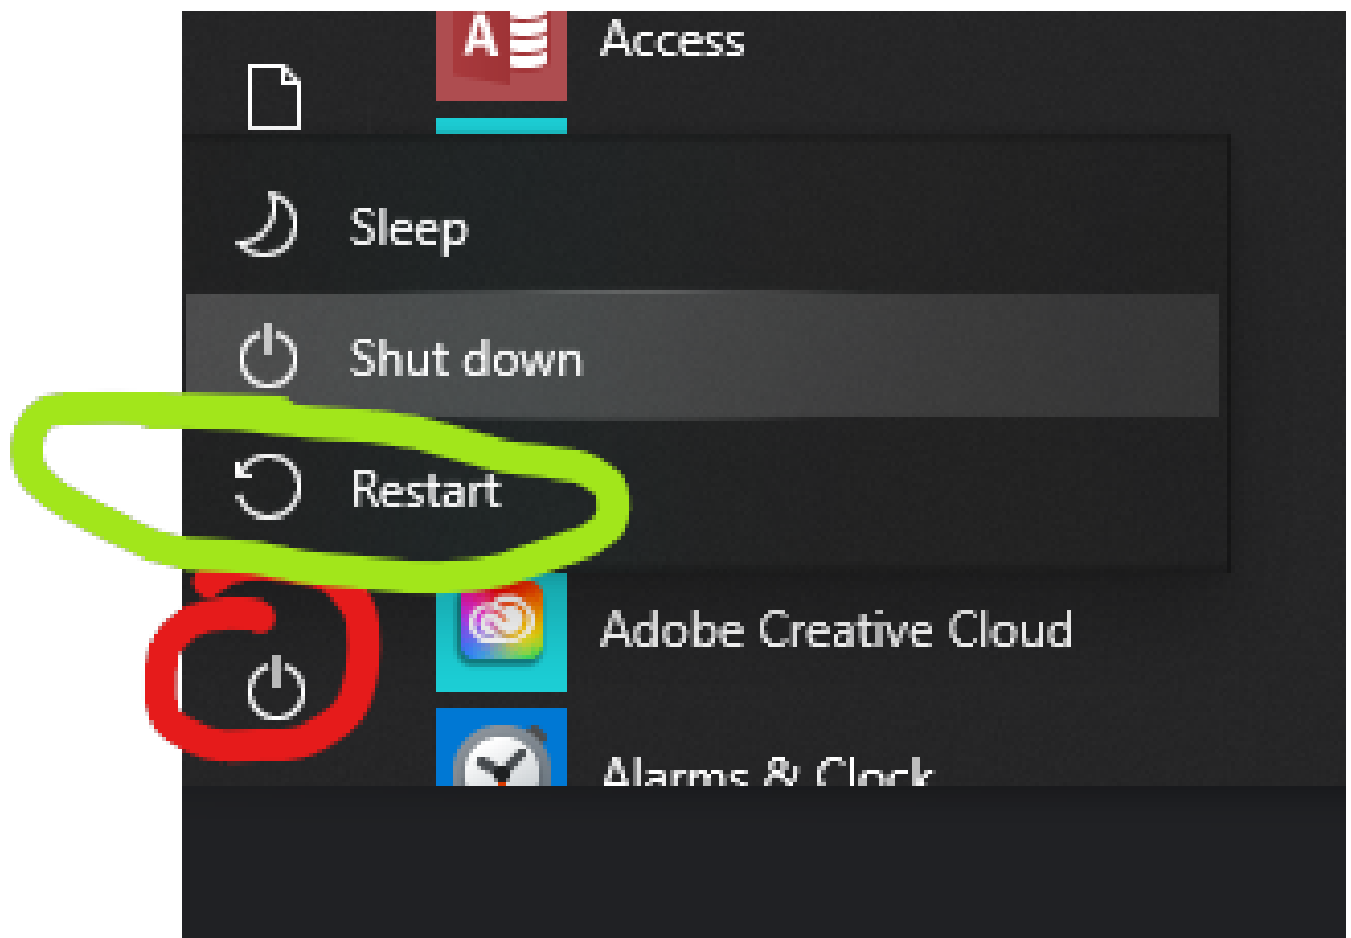

2. Make sure the "Automatically restart system (when required)" option is **checked on**, then click the **Install** button.

3. This will begin to install any pending driver updates for your system. You can view the status of the installation process from the progress bar.

4. After the updates have been installed the device will automatically restart. If the device does not restart automatically you can manually restart by clicking the **Start menu**, then click **Power** icon and choose the **Restart** option.
